SKILLS

I specialize in building web applications using technologies like **React**. In my projects, I use techs such as **Next.js**, **SQL**, **Node.js**, **PostgreSQL**, **Firebase** and **Python** among others.

EXPERIENCE

E-Commerce

<https://frontend-seven-blond.vercel.app/>

January 2024 - February 2024

- Developed on **React**.
- Allows the owner to add and modify products from **Airtable** that will automatically sync with **Firebase**.
- Allows the user to sign up through passwordless auth and purchase products using **MercadoPago**.
- Documented API in **Postman**.

Rock Paper and Scissors Online

<https://ppt-online-react.vercel.app/>

March 2024

- Developed on **React**.
- Allows players to play in real time.
- NoSQL database in **Firebase** connected to **SWR** to retrieve data in real time.

Project and Construction Management

2021 - Present

I dedicated myself to the construction industry thanks to my highschool studies. There, I gained experience both in project planning and documentation of technical information as well as in communication and coordination among the different agents involved in the project and construction process.
